

# MIKALOR

In Mikalor simulate customer applications and carry out trialing and testing of the performance of our clamps, thereby ensuring that our customers' clamps will give optimum performance in their future application.

We are very aware of the importance of a hose clamp to a vehicle engine. For this reason, we have concentrated on the design and manufacture of fastening systems and pre-mounted hose clamps in order to provide the best possible solutions to the automotive industry and to ensure that there are no leaks in air or fluid systems.

Mikalor manufactures a wide range of solutions which have been designed specifically for the following applications requiring clamps: Heating systems, Air induction systems, Cooling systems, Emission control.

**Mikalor** has been certified as an organization with a Quality Management system (**IATF 16949:2016**) which meets the needs of the automotive sector, allowing us to adapt to the changing needs in the supply chain and the life-cycle of the articles supplied with a clear focus on continuous improvement; risk prevention, reduction of variations and waste disposal. This certification represents worldwide recognition of our Quality Management system for the automotive sector.
