

Nufast Limited is a rapid turnaround business specialising in the manufacture and distribution of Fasteners, Pressed Parts, Special Cold Forged Components and Associated Machinery and Tooling.

Optical Sorting Investment

As an innovation-driven company Nufast have recently increased its Optical Sorting operation and expanded inspection technologies by investing in new innovative sorting equipment for high speed 360 ° inspection of small to medium diameter headed fasteners and components.

"The NEW inspection machine addition further enhances our inspection capabilities and optical sorting solution. Now consisting of two high precision models ACV-1604 and ACV-1605 we now offer the most advanced High-Speed Inspection Technology capable of solving the toughest inspection & sorting problems for auto parts, screw, bolt, cold forged product and headed fasteners to meet the growing demand of optical inspection of components for our clients"

Craig Lawson
Managing Director

Inspection criteria

fastener parts head width / height / pinhole depth / recess shape / burr in recess / spiral thread / thread I.D. / thread E.D./ neck length / shank vertical / screw length / first thread / drunk thread / head crack / plating / insert nut thread / burr / dimension / etc.

Application for fastener, automotive screws sorting, parts inspection. Our Auto optical inspection machines are suitable to solve the quality problems of delicate screws, nuts, rods, micro parts, general fastener, auto parts, precise semiconductor parts, medical related products and other ODM parts.
